EDUCATION

- **Cornell University** **Ithaca, NY**
(Bachelor of Arts in Mathematics and Computer Science) (Expected Graduation: 2025)
Relevant Coursework:
 - CS 2110 (OO Design and Data Structures)
 - CS 2800 (Discrete Structures)
 - MATH 2230 (Theoretical Linear Alg & Calc)
 - CS 4180 (Theory of Computing)
 - CS 6110 (Advanced Programming Languages)
 - CS 3110 (Data Structures and Functional Programming)

PROJECTS / RESEARCH

- **Domain Specific Language for differential equations with Scott-Starchey semantics** (Oct 2020 - March 2021)
 - Created a domain specific programming language for solving differential equations, and developed the denotational semantics of the language.
 - Awards: Most Outstanding Exhibit in Science, Technology, Engineering, and Mathematics from Yale University | Mu Alpha Theta Award | Regeneron International Science and Engineering Fair 2021 Finalist
 - Tools: TypeScript, PEGjs, JavaScript, Haskell, HTML/CSS
- **Calc 2: A Concatenative Oriented Programming Language** (June 2020 - July 2020)
 - Created a stack based language with pattern matching. Everything is an "expression", which is just a sequence of instructions, like pushing something onto the stack, popping something, or calling a function.
 - Tools: Raku
- **Pythagorean Triples in Pascal's Triangle: A computational and algebraic approach** (Sept 2019 - February 2020)
 - Developed an algorithm for expressing Pythagorean Triples in terms of Pascal's Triangle, and created a C++ command line tool for showing the algorithm explicitly.
 - Awards: The Office Naval Research Science Award | Mu Alpha Theta Award | Regeneron International Science and Engineering Fair 2020 Finalist
 - Tools: C++, Coq

TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Java, Ruby, Crystal, OCaml, Nim, Rust, Raku, Haskell, Elixir, Coq, HTML/CSS/JavaScript, TypeScript, Prolog, Mathematica, MATLAB, LaTeX
- **Tools:** Git, Unix, VSCode, IntelliJ IDEA, Docker, Jekyll, Tmux, PEGjs

INTERNSHIPS / EXTRACURRICULARS

- **Google Computer Science Summer Institute** | *Scholar* | *Remote* (June 2021 - August 2021)
 - Participated in a 4-week intensive computer science summer program for high-achieving students, went through curriculum taught by Google engineers, and delivered a final project presentation to Google employees.
 - Tools: JavaScript, p5.js, node.js, socket.io
- **Internship Research / Engineering Apprenticeship Program** | *Researcher* | *Río Piedra, PR* (June 2020 - July 2020)
 - Learned about the applications of physics in electronics with doctoral physics students at the University of Puerto Rico and developed several Arduino projects and made a final report and own project demonstrating the functionality of an Arduino.
 - Tools: C++, Arduino

ADDITIONAL INFORMATION

- **Languages:** [Native] English, [Native] Spanish, [Fluent] Italian
- **Interests:** Theoretical Computer Science (Programming Languages), Combinatorics, Category Theory, Topology, Linguistics
